1140 WIEN, AUSTRIA

FROM GUIDED SURGERY TILL IMPLANTATION WITH LIVE DEMO

THEORETICAL-PRACTICAL COURSE

ANDREA SESSA

DR. DR. JOHANNES REICHSTHALER

Abstract

From Guided Surgery till Implantation with Live Demo

A comprehensive course guiding clinicians from digital planning to live implant placement.

The program includes a full presentation of the Real Guide software for guided surgery planning. Participants will follow the step-by-step development of two real clinical cases, from digital planning to surgical guide design and production.

In the afternoon session, implants will be placed live on patients, demonstrating the complete workflow in a real clinical setting, from guided surgery to final implant insertion.

A high-impact educational experience designed to transform digital planning into clinical precision and predictability.
